

Daytona[®]

Professional Anti-Aging Products for Skin Rejuvenation and Biorevitalization

Daytona[®] Laboratory, Inc.

Daytona[®] Laboratory, Inc. is the exclusive manufacturer of the Daytona[®] line of professional skin rejuvenation and anti-aging serums for in-office treatment by dermatologists, plastic surgeons, and other aesthetic medical professionals.

Partnerships with leading dermatologists have contributed to our development of clinically proven serums which are highly effective and suitable for all skin types.

Biorevitalization

Every woman seeks to preserve her beauty and youth for as long as possible and wants her skin to remain resilient, without wrinkles, and to have her facial oval retain its definition. No one is able to stop time, but it is possible to reduce the signs of aging with the help of modern aesthetic medicine achievements.

Daytona[®] serums contain FDA approved ingredients which all affect the complex signs of aging. Daytona[®] serums are innovative and highly effective, providing a non-surgical solution to recover the skin tone, elasticity and color inherent in young skin.

Quite a stable effect can be observed after treatment with Daytona[®] serums ... improvement in collagen production, skin turgor and elasticity ... deep hydration of all skin layers ... pronounced lifting effect, reduction of deep wrinkles and disappearance of small wrinkles.

Your physician or esthetician will analyze your skin and recommend the appropriate treatment regimen.

Dr. Robert Bedrosian
Founder

Daytona® Pure Non-Cross-Linked Hyaluronic Acid Gel

Daytona® Pure has a single purpose...
to restore youthfulness to skin by re-growing your own natural collagen.

Daytona® Pure is 100% genuine medical injection-grade hyaluronic acid ... not to be confused with sodium hyaluronate which is often marketed as “hyaluronic acid.”

NOTE: Sodium hyaluronate is a chemically neutralized sub-variant of hyaluronic acid developed as a moisturizing additive for skin cream. It retains the hydrating properties of its big brother hyaluronic acid, but unfortunately, sodium hyaluronate is a different molecule that is not recognized by your skin, and does not promote the growth of collagen. Read the ingredients list of your favorite “hyaluronic acid” serum to find out what’s really in it.

Daytona® Pure is quickly absorbed by your skin and will persist for about 60 days, improving your skin’s hydration, elasticity and tone, and promoting the growth of your own natural collagen. Collagen gives the skin its firmness and Daytona Pure nourishes the collagen. Daytona Pure supplements the intercellular matrix and the intradermal tissue in order to restore lost skin structure, for a firm and healthy look, to give you the refreshed appearance you desire.

Re-growing collagen takes time. We recommend an initial treatment regimen of 4 treatments over 9 weeks to achieve the desired result. We recommend one maintenance treatment, once every 2 months to keep the initial results. Typical treatment areas are the face, neck, backs of hands, and décolletage.

**After Full Course
of 4 Treatments**

** Daytona® Pure is intended for professional use as a topical nutritive essential serum.*

** Your doctor or esthetician will evaluate your skin and recommend the appropriate treatment regimen.*

Daytona® SR Skin Rejuvenation Serum

Daytona® SR targets environmental damage on skin, treating the skin at the surface, restoring its natural youthful look. SR combines 57 of the most effective ingredients for skin rejuvenation including 3.0% Genuine Medical Grade Hyaluronic Acid, Genuine Biologically Active Growth Factors, Peptides, Amino Acids, Anti-Oxidants, Coenzymes, Vitamins and Minerals.

Daytona® SR is also highly effective on stretch marks, cellulite, and acne scarring making it the most complete skin care treatment available.

Typical treatment areas are the face, neck, backs of hands, and décolletage. We recommend 4 to 10 treatments to achieve the desired result. Typically stretch marks and cellulite can be mitigated with 2-4 treatments.

** Daytona® SR is intended for professional use as a topical nutritive essential serum.*

** Your doctor or esthetician will evaluate your skin and recommend the appropriate treatment regimen.*

Daytona® SR8 Skin Rejuvenation Booster

Daytona® SR8 Skin Rejuvenation Booster is the next generation of Skin Rejuvenation Serum from Daytona Laboratory. Daytona SR8 starts life as a concentrated double dose of all ingredients found in Daytona® SR. But we didn't stop there.

Daytona® SR8 includes 8.0% Medical Grade Hyaluronic Acid, five Peptides (double dose), and a double dose of DNA Repair Enzymes (sometimes referred to as Stem Cell Technology) that recognize and correct physical damage in DNA, primarily caused by exposure to radiation and UV light (sunlight).

Typical treatment areas are the face, neck, backs of hands, and décolletage.

Ingredients:

- 8.0% Medical Injection-Grade Hyaluronic Acid which provides deep hydration and promotes the growth of collagen.
- 4 Biologically Active Growth Factors.
- 5 Peptides and 24 Amino Acids ... but you could say Peptides and more Peptides because the Amino Acids combine in the skin to form polypeptides and pentapeptides.
- DNA Repair Enzymes (Coenzymes, Nucleic Acids and Anti-Oxidants) for cellular health and optimization.
- Vitamins and Minerals ... nutrition for your skin ... to keep your skin looking healthy and youthful.

** Daytona® SR8 is intended for professional use as a topical nutritive essential serum.*

** Your doctor or esthetician will evaluate your skin and recommend the appropriate treatment regimen.*

Daytona® SB Skin Brightening Serum

Daytona® Ek Anti-Ecchymotic Tablets

Daytona® SB Skin Brightening Serum contains natural skin whiteners and peptides to help diminish dark spots, refine skin texture, and create an overall luminous complexion with the perfectly toned, even skin that we all dream about.

Treatment areas include the face, neck, backs of the hands, and décolletage. Recommended treatment regimen is 2 to 6 treatments in 7 to 10 day intervals, until the desired result is achieved.

AFTER 1 TREATMENT

AFTER 2 TREATMENTS

** Daytona® SB is intended for professional use as a topical nutritive essential serum.*

** Your doctor or esthetician will evaluate your skin and recommend the appropriate treatment regimen.*

** These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.*

Daytona® Ek Anti-Ecchymotic Tablets

Reduces Bruising After Injections

Ecchymosis (Ek-e-mo-sis) - the medical term for bruising.

Daytona® Ek is an all-natural homeopathic medicine made from the herb Arnica Montana. Arnica Montana is clinically proven to significantly reduce bruising, swelling and pain after Botox®, Dermal Fillers and other injection procedures. Reduces redness after microneedling.

Daytona® HL Anti-Hair-Loss Serum

Daytona® SR-M Skin Rejuvenation Mask

Daytona® HL treats the known factors of hair loss, stops the progress of hair loss, and stimulates the re-growth of new hair. Daytona HL uses Biologically Active Growth Factors, Peptides, Amino Acids, Coenzymes, Vitamins and Minerals to provide a localized increase in blood flow and stimulate cell growth.

One of the key ingredients in Daytona HL is Glutathione, a tripeptide and one of the most powerful antioxidants found in the human body. Glutathione nourishes hair follicles, aiding in the cellular exchange needed to produce hair. In a clinical study of patients with Alopecia, treatment with Glutathione was shown to stimulate inactive hair follicles to begin growing new hair.

One Treatment per Week, for 13 Weeks

** Daytona® HL is intended for professional use as a topical nutritive essential serum.*

** Your doctor or esthetician will evaluate your scalp and recommend the appropriate treatment regimen.*

** These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.*

Daytona® SR-M Skin Rejuvenating Mask

Brightening and Anti-Aging Treatment

Daytona SR-M is a biocellulose mask made of natural organic fibers and containing essential nutrients from Skin Brightening Serum and Skin Rejuvenating Serum. The mask was designed as a soothing and calming mask, and as supplemental serum treatment after procedures such as laser peel, microdermabrasion or microneedling. It can also be used as a stand-alone treatment for brightening and anti-aging.

** These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.*
