

Product Data Sheet Daytona® Ek Anti Ecchymotic (Anti Bruising)

All Natural Homeopathic Arnica Montana reduces bruising after Injectables and after MicroNeedling.

Reduces bruising, swelling and pain after Botox®, Dermal Fillers and other injection procedures.

Ecchymosis (Ek-e-mo-sis)
The medical term for bruising.

Daytona® Ek is an all-natural homeopathic medicine made from the herb Arnica Montana. Arnica Montana is clinically proven to significantly reduce bruising and swelling after injections.

Arnica Montana has been safely used for hundreds of thousands of plastic surgeries and has become an increasingly common treatment in many types of surgeries. When taken, starting right after the procedure, Daytona® Ek helps speed the post-operative recovery process by reducing uncomfortable swelling and bruising, and often post-operative pain, as well.

What is Arnica Montana?

Arnica Montana is a European flowering plant, endemic to the Swiss Alps, used in herbal medicine. Also known simply as "Arnica," it's been used in Europe for hundreds of years for the reduction of bruising and swelling and to shorten the recovery period after a physical trauma such as an accident, surgery or injury.

Directions

Daytona® Ek concentration and dosing regimen is specially formulated to reduce bruising, swelling, and pain after dermal fillers and other injection procedures. Dissolve 4 tablets under tongue every 6 hours, starting as soon as possible after injection or microneedling.

Ingredients

Arnica Montana 30X HPUS in a base of Lactose USP.

Warnings

Do not use if cap band is missing or broken. Do not eat or drink anything 15 minutes before and after taking Daytona® Ek. As with any drug, if you are pregnant or nursing, consult your health care professional before use. Keep out of reach of children.
