

Daytona® SB Skin Brightening Serum

Daytona® SB Skin Brightening Serum contains natural skin whiteners and peptides to help diminish dark spots, refine skin texture, and create an overall luminous complexion with the perfectly toned, even skin that we all dream about.

Treatment areas include the face, neck, backs of the hands, and décolletage. Recommended treatment regimen is 2 to 6 treatments in 7 to 10 day intervals, until the desired result is achieved.

Ingredients

- **Bearberry Plant Extract** (Alpha-Arbutin) is a natural skin whitener that is used as a lightening agent to fade freckles and skin discoloration, and meets all the requirements for modern skin-brightening and skin depigmentation.
- **Licorice Root Oil** (Glycyrrhiza Glabra) is a natural skin whitener, antioxidant, anti-inflammatory, and moisturizer, that is used to reduce dark age spots and whiten skin.
- **Ethyl Ascorbic Acid** (modified Vitamin C) is derived from stable, natural Vitamin C, modified to increase stability and enhance transport through skin. Once in the skin, the Vitamin C is restored to its natural form. Ethyl Ascorbic Acid retains the benefits of Vitamin C, such as antioxidant properties, and collagen synthesis, but it is more potent in reducing skin darkening after UV exposure.
- **Pentapeptide-13** and **Oligopeptide-34** are Peptide skin conditioners that also act as skin brighteners by inhibiting Tyrosinase, an enzyme that catalyzes the production of melanin.

Specifications

- Sterile packaged in 5.0 ml glass vials
- 3-year shelf life
- Room temperature storage

Packaging

(10) Vials (5.0 ml) per box. One vial is one treatment.
