

Daytona[®] SR8 Booster

Daytona SR8 Skin Rejuvenation Booster is the next generation of Skin Rejuvenation Serum from Daytona Laboratory. Daytona SR8 starts life as a concentrated double dose of all ingredients found in Daytona SR. But we didn't stop there.

Daytona SR8 includes 8.0% Medical Injection Grade Hyaluronic Acid, five Peptides (double dose) and a double dose of DNA Repair Enzymes (sometimes referred to as Stem Cell Technology) that recognize and correct physical damage in DNA, primarily caused by exposure to radiation and UV light (sunlight).

Typical treatment areas are the face, neck, backs of hands and décolletage.

Ingredients:

HYALURONIC ACID

Daytona SR8 contains 8.0% genuine Injection Grade Hyaluronic Acid which provides deep hydration and promotes the growth of collagen.

NOTE: Daytona SR8 contains no sodium hyaluronate. Sodium hyaluronate is a derivative of hyaluronic acid ... a different molecule ... developed as a moisturizing ingredient for skin cream. Sodium hyaluronate does not occur naturally, is not recognized by your body, and does not promote collagen growth. Sodium hyaluronate is often marketed with deceptive names like short-chain hyaluronic acid or low molecular weight hyaluronic acid.

BIOLOGICALLY ACTIVE GROWTH FACTORS

Daytona SR8 contains four biologically active Growth Factors.

Basic Fibroblast Growth Factor (bFGF), Epidermal Growth Factor (EGF), Insulin-Like Growth Factor-1 (IGF-1), Thioredoxin (TRX).

NOTE: Daytona SR8 contains genuine Growth Factor, not "Growth Factor Conditioned Media" which contains only a few molecules of Growth Factor, secreted into the media during the Growth Factor production process.

PEPTIDES AND AMINO ACIDS

You could say Peptides and more Peptides because the Amino Acids combine in the skin to form polypeptides and pentapeptides.

Peptides: Rh-Oligopeptide-1, Rh-Oligopeptide-2, Ph-polypeptide-1, Ph-polypeptide-2, Copper Tripeptide-1.

Amino Acids: Aminobutyric Acid, Alanine, Glycine, Isoleucine, Methionine, Proline, Threonine, Valine, Aspartic Acid, Arginine, Cystine, Hydroxyproline, Leucine, Ornithine, Serine, Tryptophan, Glutamic acid, Asparagine, Glutamine, Histidine, Lysine, Phenylalanine, Taurine, Tyrosine.

DNA REPAIR

Coenzymes, Nucleic Acids and Anti-Oxidants for Cellular Health and Optimization.

Coenzymes: Nicotinamide Adenine Dinucleotide (NAD), Disodium Flavin Adenine Dinucleotide (FAD), Coenzyme A, Cocarboxylase.

Nucleic Acids: Adenosine Cyclic Phosphate, Cytosine, Guanosine, Thymine.

Anti-Oxidants: Glutathione.

VITAMINS AND MINERALS

Nutrition for your skin. Vitamins and minerals keep your skin looking healthy and youthful.

Vitamins: Retinol (Vit.A), Thiamine Nitrate (Vit.B1), Riboflavin (Vit.B2), Niacinamide (Vit.B3), Calcium Pantothenate (Vit.B5), Pyridoxine (Vit.B6), Biotin (Vit.B7), Aminobenzoic Acid (Vit.B10), Cyanocobalamin (Vit.B12), Ascorbic Acid (Vit.C), Tocopherol (Vit.E), Inositol (Vit.I), Menadione (Vit.K3), Folic Acid.

Minerals: Calcium Chloride, Potassium Chloride, Magnesium Sulfate, Sodium Phosphate.

NO PRESERVATIVES

SR8 is a sterile solution and contains no preservatives. Use the entire vial after opening.

* Daytona SR8 is intended for professional use as a topical nutritive essential serum.
